

Production Machine Operator

Are you a detail-oriented individual with a knack for operating machinery and ensuring quality production? Our company is seeking a skilled Production Machine Operator to join our team. As an essential member of our production department, you will play a crucial role in running and maintaining machinery to meet production targets and quality standards. If you have a strong work ethic, mechanical aptitude, and commitment to excellence, we invite you to apply and become an integral part of our production team.

About the Company

Connection Technology Center (CTC) is the global leader in the design & manufacture of cutting-edge vibration analysis hardware for machine condition monitoring. As a family-owned & operated business for 30 years, we are proud to play a crucial role in preventing operational disruptions, financial losses, and safety concerns for heavy industry. From small scale manufacturing to Fortune 500 companies in Paper & Pulp, Auto & Steel, Food & Beverage, Pharmaceutical, Mining and many more, our mission is to create products that help ensure seamless operational uptime and contribute to a safer, more efficient manufacturing future.

Main Responsibilities

- Set up and adjust machines for each production run, ensuring proper settings for cycle times.
- Select from pre-set programs to operate machines.
- Operate machines to produce components according to established specifications and quality standards.
- Assemble products to the work instructions provided via ISO 9001 certification.
- Conduct regular quality checks on produced components to ensure they meet specified criteria; identify and address any defects or issues promptly.
- Optimize machine output by loading the next product prior to mold cycle completion.
- Adhere to all safety protocols and guidelines to maintain a secure working environment; report any safety concerns or incidents immediately.
- Maintain accurate records of production data, including quantities produced, downtime, and any issues encountered during the manufacturing process.
- Work closely with other team members, including engineers and quality control staff, to ensure seamless production processes and troubleshooting.

Requirements

- High School diploma or equivalent required.
- Proven experience as a Machine Operator in a manufacturing environment preferred.

Knowledge, Skills, and Abilities

- Technical knowledge of machines and related equipment.
- Ability to read and interpret technical drawings and specifications.
- Ability to install tools into machine and make tooling insert changes, as needed.
- Strong attention to detail and quality standards.
- Basic mechanical aptitude and troubleshooting skills.
- Good communication and teamwork skills.

Work Location

This in-person position will work out of the Victor, NY facility.

Salary Range:

Starting at \$20 / hour

Benefits

- Health Insurance
- Dental Insurance
- Vacation Time
- Sick Leave
- 401K plan with Employer Match
- Summer golf membership to Bristol Harbour Private Golf Course
