

CONNECTION TECHNOLOGY CENTER, INC.

EU Critical Raw Materials (EU CRM) Regulation (EU) **2024/1252**

The EU's Critical Raw Materials (CRM) regulation defines materials crucial for Europe's economy, key industries, and the production of everyday items and advanced technologies. These materials are designated as 'critical' due to their significant economic importance to the EU combined with a high vulnerability to supply disruptions. The list serves as a key instrument for the European Union, guiding policies and initiatives aimed at enhancing supply security, promoting domestic sourcing and circularity, and diversifying supply chains for these essential resources.

This declaration applies to all products sold by Connection Technology Center. This declaration applies to the substance list version as of March 25, 2026 and remains valid unless material changes to the product(s) occur, of which customers will be notified, or until declaration is updated in response to changes in applicable regulation(s) and materials.

Based on the information received by our suppliers and the best of our knowledge, our products do not intentionally contain any of the EU Critical Raw Materials as defined by the regulation. Connection Technology Center, Inc. makes this statement without representation of warranty, expressed or implied, in connection to the use of this information
