

CONNECTION TECHNOLOGY CENTER, INC.

Toxic Substance Control Act (TSCA)

The Toxic Substances Control Act (TSCA) is a US federal chemicals management regulation. Multiple sections of TSCA outline substances and substance groups that are restricted and/or reportable based on their properties, posing unreasonable risk to humans and the environment, as identified by the EPA. Some of the chemicals with restrictions can be used in certain scopes or with applicable exemptions. This declaration indicates whether a TSCA restricted substance is contained or not contained, without consideration of thresholds.

This declaration applies to all products sold by Connection Technology Center, Inc. This declaration applies to the substance list version as of March 25, 2026 and remains valid unless material changes to the product(s) occur, of which customers will be notified, or until declaration is updated in response to changes in applicable regulation(s) and materials.

Based on the information received by our suppliers and the best of our knowledge, our products do not intentionally contain any of the TSCA restricted substances. Connection Technology Center, Inc. makes this statement without representation of warranty, expressed or implied, in connection to the use of this information.
