

## Trainee Plant Operator

Our company is seeking a motivated Trainee Plant Operator to join our team, focusing on the operation and maintenance of sewer and water treatment plants. As a trainee, you will receive comprehensive training and mentorship to develop the skills and knowledge necessary to ensure the safe and efficient operation of our treatment facilities. If you have a strong work ethic, a passion for environmental stewardship, and a desire to make a difference, we invite you to apply and embark on a fulfilling career journey with us.

### About the Company

The utility companies within Bristol Harbour community serve the purpose of providing water and sewage treatment services to residences. Both utilities have over 5 miles of underground piping infrastructure to maintain, while meeting the rigorous regulatory standards required by the NYS DOH and DEC for our respective facilities. If you like to challenge your mind and work with your hands, come work for our water and sewer plants. It is an interesting process creating potable drinking water & treating sewage, in a manner that is safe for the community that we live in.

### Main Responsibilities

#### On-the-Job Training:

- Receive comprehensive training on the operation of sewer and water treatment processes.
- Learn to operate and monitor equipment, pumps, motors, and control systems.

#### Equipment Maintenance Assistance:

- Assist in routine maintenance tasks for plant equipment and machinery.
- Learn preventive maintenance procedures and participate in equipment inspections.

#### Regulatory Compliance Support:

- Follow established procedures to ensure compliance with environmental regulations and permit requirements.
- Assist in maintaining accurate records for regulatory reporting.

#### Sampling and Analysis Assistance:

- Learn to collect samples of water and wastewater for analysis.
- Assist in conducting basic laboratory tests to assess water quality.

#### Safety Training:

- Participate in safety training programs to understand and adhere to safety protocols.
- Learn emergency response procedures and participate in drills.

#### Data Monitoring:

- Observe and learn to monitor data related to plant operations, including flow rates, chemical dosages, and equipment status.
- Report any irregularities or deviations to experienced plant operators.

### Requirements

- High School diploma or equivalent.

## **Knowledge, Skills, and Abilities**

- Basic mechanical aptitude and interest in technical processes.
- Strong willingness to learn and follow established procedures.
- Effective communication and teamwork skills.
- Problem-solving and decision-making abilities.
- Must be able to work individually as well as in a small team environment.

## **Work Location**

This is an in-person position.

## **Salary Range:**

\$23.00 - \$25.00 per hour
